### College Self-Assessment

Palo Verde College, established in 1947, is a small college with a diverse and complex student constituency. In addition to delivering instructional programs to students attending the Blythe main campus, the College provides instruction to students residing in Needles (100 miles north of Blythe), inmates incarcerated at two nearby state prison facilities, inmates located at fourteen other correctional facilities in California, students enrolled in noncredit programs in Blythe, and public safety personnel through instructional services agreements (ISAs) in Riverside and other locations in California.

Here follows our analysis of the ARCC-2012 performance indicators for Palo Verde College:

Table 1.1 Student Progress and Achievement Rate. We attribute the welcome turnaround in this rate to an increased emphasis on promoting the completion of degrees and certificates and transfer to four-year institutions. The fact we are slightly below average in our peer group, however, suggests we have room in which to improve.

Table 1.1a Percent of Students Who Earned at Least 30 Units. We are again pleased with our improving performance in this measure, but we recognize that we fell to a slightly below average position in our peer group. Nonetheless, the commitment of College personnel to improve retention and persistence seems to be meeting with continuing success.

Table 1.2 Persistence Rate. In the most recent cohort, the College showed considerable improvement over preceding cohorts, but fell to the low point in our peer group. The comparatively low rate can be explained partly by the substantial number of ISA students seeking skill enhancements, but who do not intend to re-enroll to complete a degree or certificate.

Table 1.3 Annual Successful Course Completion Rate for Credit Vocational Courses. The completion rate for this measure declined slightly, but remains in about the same position—just above the low point—in our peer group, as it did in the preceding cohort.

Table 1.4 Annual Successful Course Completion Rate for Credit Basic Skills Courses. The College's performance in this measure is doubly disappointing: the rate declined slightly from the previous cohort, and it remains at the low point in our peer group. The College recognizes it has work to do in the credit basic skills program, especially in encouraging students to complete their initial basic skills courses.

Table 1.5 Improvement Rates for Credit Basic Skills Courses. The College's performance declined slightly in the most recent cohort, but maintained its position at slightly below average in our peer group. The performance in this measure remains consistently higher than that described in Table 1.4 above, suggesting students perform better once they have passed the hurdle of their initial basic skills courses.
